

# EXPLORE DAYS / What will it take?

If you have a passion to love and serve Muslims where Jesus is not yet known then Explore could be for you!

9 October - High Wycombe  
(Science Special - see info overleaf)

23 October - Manchester

6 November - Birmingham

20 November - Southampton

(All days run from 10am - 4pm)

The day's programme will leave plenty of space for interaction and conversation. The main focus will be on what it takes to go, live and work in a Muslim community. Whatever point you may be at, from making initial enquiries to looking for more in-depth advice and training, Explore is about being better prepared for the journey.

"The Explore day helped me get my head around it all; I could imagine much more what it was going to be like serving God in the Muslim world." Ben.

"We talk of the **second coming**; half the world has never heard of the **first**." Oswald J. Smith.  
Get Exploring and let's change that!

## frontiers

Frontiers, PO Box 600, Hemel Hempstead, HP3 9UG  
[www.frontiers.org.uk](http://www.frontiers.org.uk)

A great feature of the day is the opportunity to meet and hear from experienced field workers who will be around to answer your questions and to give you an inside look at what it's like to live and work in the Muslim world.

Explore days are also very valuable for those who stay in the UK to send and support others.

- >> There is no cost for the day
- >> Please bring a packed lunch
- >> Drinks are provided

**To find out more or to book a place on one of our Explore Days, drop an email to [gillie@frontiers.org.uk](mailto:gillie@frontiers.org.uk) or give the Frontiers office a call on 0303 333 5051**

*"Tremendously valuable - an opportunity to voice my questions"* Alan.

### **Extra info about our special Science Explore Day High Wycombe - 9th October**

This Explore is particularly for those involved in (or interested in) the Sciences. Could you use your conservation skills? Are there opportunities in bio-sciences, physics, chemistry and geology for long term service? Could you assist short-term by coaching field workers? Could palaeontologists see worshipping communities amongst the unreached? Possibilities are almost endless. Science skills are in demand in the Muslim world and our speakers on the day will be highlighting some current trends, case studies, research needs, and opportunities.
